Music Label & Content Distribution Platform	13
Proprietary Data Transmission Protocol	14

Introduction

The background of the slide is black. A prominent, glowing, curved line composed of many small white dots starts from the bottom left and curves upwards and to the right, fading into the background. The dots are more densely packed in some areas, creating a sense of depth and movement.

We create custom software solutions tailored for businesses and government entities

With a strong focus on innovation and a commitment to excellence, we empower businesses and government organisations to thrive in the ever-evolving telecommunications landscape.

Our team of experts specializes in developing custom software solutions tailored to your unique requirements, helping you stay ahead in a competitive industry.

Capabilities

Product Development

Agile methodologies, combined with advanced expertise in React, Vue, Symfony, and AWS infrastructure, ensure a seamless transition from MVP to full-scale product deployment, outstanding technical support, and unlimited scalability.

IT Consulting

From the initial concept to the final implementation, our software development and consulting services support you at every stage of your project, ensuring a smooth and efficient process of technological modernization.

Blockchain Development

At the forefront of blockchain innovation, we specialize in designing and developing decentralized applications (dApps) that deliver transparency, security, and efficiency. By leveraging the power of blockchain technology, our solutions foster trust and enable seamless interactions across various sectors, including finance, supply chain, and digital identity.

Our commitment to excellence, combined with deep technical expertise, ensures that we deliver cutting-edge applications tailored to the unique needs of our clients, helping to shape the future of decentralized technology.

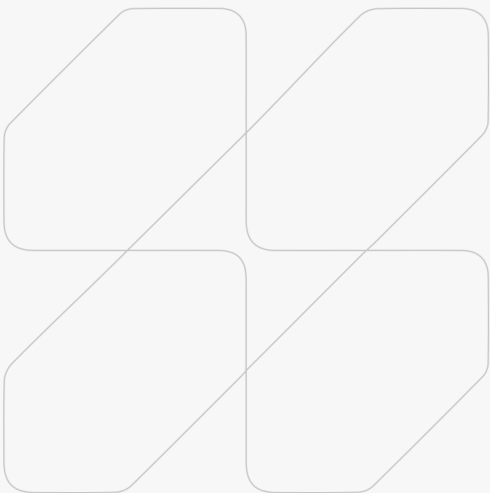

Innovations

Artificial Intelligence

By integrating AI into your business, we empower your company with intelligent automation, predictive analytics, and personalized solutions that drive efficiency. Our approach ensures that AI implementation is seamlessly aligned with your strategic objectives, enabling you to stay ahead in the digital era.

Data Transmission

Use our innovative data transfer protocols to enable fast, secure, and efficient information exchange between platforms and devices. Our approach empowers customers to fully leverage the potential of distributed systems and cloud services, enhancing productivity while maintaining complete control over transmitted data.

Home Electro System

Transform your home into a hub of convenience, energy efficiency, and security with our state-of-the-art Smart Home Management System. Designed for modern living, this solution gives you complete control over your home's essential systems, helping you save energy, enhance safety, and simplify daily life. Whether you're at home or away, enjoy peace of mind knowing your home is intelligently managed with just a tap or a voice command.

Effortless Control

Manage heating, water supply, electrical appliances, ventilation, and split systems through intuitive web and mobile apps.

Hands-Free Convenience

Seamlessly integrated with Google Assistant SDK and Apple HomeKit for effortless voice control.

Enhanced Safety

Compatible with third-party sensors for leak detection, air quality monitoring, and humidity control.

Enjoy the perfect blend of technology and simplicity to create a smarter, safer, and more sustainable lifestyle.

Retherve Capital

Dominate the fast-paced financial markets with a powerful platform that combines speed, precision, and data-driven decision-making. Designed for traders and investors, it provides advanced tools to forecast market trends, manage risks, and automate strategies — empowering you to make smarter, faster moves in volatile markets.

Predictive Analytics

Advanced modeling powered by C/C++, Python, R, and TensorFlow delivers accurate market forecasting.

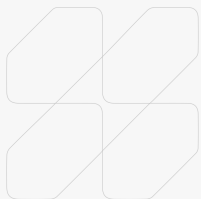

Live and Historical Data Insights

Process real-time data from CEX and DEX exchanges using WebSockets, InfluxDB, and PostgreSQL.

Smarter Strategies

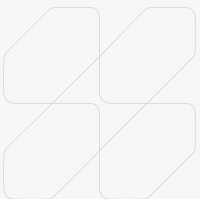

Algorithmic hedging models and automated portfolio management tools help you navigate market volatility with confidence.

Stay ahead of the curve with a platform designed to meet the demands of high-frequency trading and strategic investment planning.

Digital Twin System

Revolutionise your industrial operations with a robust automation and monitoring solution designed to optimize processes, minimize downtime, and ensure safety. This comprehensive system delivers unparalleled precision, scalability, and efficiency in managing complex workflows, making it an essential tool for modern industries striving to stay competitive.

Precision Monitoring

Sensors and machine vision deliver real-time insights into pressure, temperature, and humidity fluctuations.

Seamless Hardware Integration

Built with C/C++, Python, Java, and SCADA, covering everything from hardware selection to circuit board programming.

Centralised Control

Accessible via a Vue.js and Spring Boot interface on both web and mobile platforms.

With this system, you can minimize operational risks, boost productivity, and drive innovation with ease.

Muzeeq Distribution

Empower artists and redefine the music industry with a platform that combines cutting-edge technology with creative freedom. This all-in-one solution provides secure distribution, innovative monetization, and AI-powered collaboration — a true game-changer for artists aiming to expand their reach and connect with fans in meaningful ways. Supporting both B2B and B2C models, the platform helps artists grow their audience, foster fan loyalty, and increase profitability in the digital era.

Content Protection

Secure your work with IPFS and smart contract-based DRM.

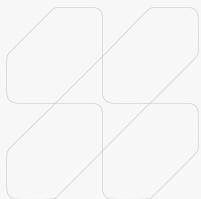

Monetisation Opportunities

Leverage NFTs and Web 3.0 token systems to unlock new revenue streams.

AI-Driven Creativity

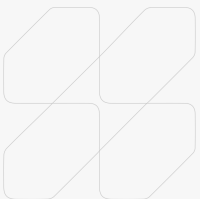

Collaborate and innovate with AI-powered tools tailored for artists.

Whether you're an independent artist or a global label, this platform provides the tools and resources you need to thrive in the digital landscape.

Unified Transport Protocol

Our proprietary data transmission protocol, developed entirely in C without third-party libraries, incorporates custom routing and packet algorithms. Operating at a low level, it ensures low-latency, high-speed data transfer across the physical (L1), data link (L2), network (L3), and transport (L4) layers of the OSI model.

Ultra-Low Latency

Pure C implementation with optimized routing delivers lightning-fast performance for HFT and real-time systems.

Full-Stack OSI Layer Coverage (L1–L4)

Operating across the physical, data link, network, and transport layers enables flexible traffic management, low-level packet control, and optimized performance in complex network environments.

Custom & Secure

Proprietary routing and packet-processing algorithms eliminate third-party vulnerabilities while providing full customization to meet the specific requirements of HPC, financial markets, and private networks.
